

AMENDMENTS TO THE SPECIFICATION

Please amend the Specification as follows:

Please replace the paragraph beginning on page 1, line 8, with the following amended paragraph:

The invention relates to a communication terminal ~~provided~~ permitting a user to selectively distort an acoustic signal inputted by the user to the communication terminal during a call to another user of a communication terminal.

Please replace the paragraph beginning on page 1, line 13, with the following amended paragraph:

In the development of mobile communication there is a trend towards more ~~personalised~~ personalized ways of communication and expression forms. An example of this is the short message service (SMS), chat, picture messaging, animations, ringing tunes, operator logos, vibrations, exchangeable covers and picture holders for personal pictures. Users have however found out that there are some limitations with these features, and have been looking for something more advanced. In the communication between the young there is often used different kinds of fantasy-languages or other ~~peculiar~~ peculiar ways of addressing each other.
